

Product Declaration - DGNB New Construction Office and Administration Buildings (NBV12)

MANUFACTURER	MKT GmbH & Co.KG
PRODUCT NAME	MKT Injection Mortar VME

Product Characteristics

Two component epoxy mortar, approved for post installed rebar connections as well as for fixings into concrete and by using threaded anchor rods or rebars. Due to long curing time especially suitable for warm environments as well as for deep drill holes.

Product Rating DGNB Criteria

- The product meets the requirements of quality level 1 to 4 and contributes to achieve 100 (of max. 100 achievable) checklist points according to criterion 'ENV1.2 Local Environmental Impact'.
- The product does not lead to toxic or corrosive fumes in case of fire. Hence this product contributes to achieve 20 (of max. 20 achievable) checklist points according to criterion 'SOC 1.7 Safety and Security'.

The product contains the following components:	Mass per unit [%]

About DGNB Products - www.dgnb.de

This declaration helps to assess products easily according the certification system DGNB. Products are not reviewed or certified by DGNB. DGNB credit requirements cover the performance of materials in aggregate, not the performance of individual products or brands. Therefore the project team or the manufacturer is responsible to declare the compliance with the project requirements to achieve DGNB points. Detailed information are on the next pages.

Product assessment for criteria ENV1.2 - Local environmental impact

The product fulfills the requirements for Quality Level 1-4

 Assessment: **Quality Level 4**
Goals and Relevance

Certain materials, construction products and preparations are a risk for soil, air, groundwater and surface water as well as for human's health, flora and fauna. In order to minimize risks for humans and the local environment, materials, (construction) products and preparations need to be reduced, avoided or substituted, which due to their material properties or ingredients are a risk for surface and ground water, soil or air. Especially those materials, (construction) products and preparations must be reduced, avoided or replaced, which affect human health, flora and fauna or harm within a short-, medium / or long-term period. This affects the entire life cycle - from production, processing at site, use of (building) inventory and disposal (dismantling, recycling, landfilling). These local risks are assessed material and product related. Hence eco-and human toxicological impact categories of LCA can not be applied due to lack of evaluation and measurement procedures.

Product Assessment

	Relevant Products	Requirements of Quality Levels	Assesment of Product	Evaluation
6	Small surface adhesions of mechanically loaded joints; not considered are areas of glass construction, facade and fire protection	Quality Level 1 No requirements Quality Level 2 No requirements Quality Level 3 The product is free of chlorinated paraffins as a component OR is certified with RAL-UZ 123 (Blauer Engel) Quality Level 4 The product is certified with RAL-UZ 123 (Blauer Engel) or equivalent	The product is free of chlorinated paraffins as a recipe component	Quality Level 4

Other remarks on classification

The product is neither an acrylate sealant or adhesive nor a silicone sealant and falls strictly speaking not under DGNB requirements. The product contributes to achieve quality level 4.

Product assessment for criteria SOC1.7 - Safety and Security

The product fulfills the requirements for prevention of fumes.

Assessment: **20 of 20**
Checklist Points

Goals and Relevance

A high sense of security contributes fundamentally to the comfort of human being. The goal is to avoid dangerous situations as much as possible and to reduce the impact of a non-preventable damage, as far as possible. The criterion safety and security assesses also the performance of products in case of fire.
