

**IZJAVA O SVOJSTVIMA**

DoP br. MKT-1.3-100\_hr

- ✧ **Jedinstvena identifikacijska oznaka vrste proizvoda:** **Beton vijak BSZ**
- ✧ **Namjena/namjene:** Mehaničko sidro za sidrenje u betonu, vidi Prilog/Annex B
- ✧ **Proizvođač:** MKT Metall-Kunststoff-Technik GmbH & Co.KG  
Auf dem Immel 2  
67685 Weilerbach
- ✧ **Sustav ili sustavi ocjenjivanja i provjere stalnosti svojstava građevnog proizvoda:** 1
- ✧ **Europski dokument za ocjenjivanje:** **EAD 330011-00-0601 + EAD 330232-00-0601**  
Europska tehnička ocjena: **ETA-16/0204, 27.11.2020**  
Tijelo za tehničko ocjenjivanje: DIBt, Berlin  
Prijavljeno tijelo/prijavljena tijela: NB 2873 – Technische Universität Darmstadt
- ✧ **Objavljena svojstva:**

Bitnih značajka	Svojstva
<b>TEMELJNI ZAHTJEVI ZA GRAĐEVINE (BWR 1)</b>	
Karakteristični otpori pod vlačnim opterećenjem (statički i kvazi-statički efekti)	Prilog / Annex C1
Karakteristični otpori pod poprečnim naprezanjem (statički i kvazi-statički efekti)	Prilog / Annex C1
Karakteristični otpor i pomaci za seizmičke performanse kategorije C1 + C2	Prilog / Annex C2, C3, C4, C7
Pomaci (statički i kvazi-statički efekti)	Prilog / Annex C6
Trajnost	Prilog / Annex B1
<b>Sigurnost u slučaju požara (BWR 2)</b>	
Ponašanje požara	Klasa A1
Otpornost na vatru	Prilog / Annex C5

Izvedba gore navedenog proizvoda je deklarirana izvedba / izvedba. Gore navedeni proizvođač jedini je odgovoran za sastavljanje izjave o učinkovitosti u skladu s Uredbom (EU) br. 305/2011.

Za proizvođača i u njegovo ime potpisao:

  
**Stefan Weustenhagen**  
(generalni direktor)  
Weilerbach, 27.11.2020

p.p.   
**Dipl.-Ing. Detlef Bigalke**  
(Voditelj razvoja proizvoda)

Izvornik ove izjave o izvedbi pisan je na njemačkom jeziku. U slučaju odstupanja u prijevodu vrijedi njemačka verzija.

## Specifications of Intended use

Concrete screw BSZ		BSZ 6		BSZ 8			BSZ 10			BSZ 12			BSZ 14

Anchorage subject to	Static or quasi-static loading	✓													
	Fire exposure	✓													
	Seismic action C1	✓	-	✓	✓	-	✓	-	✓	-	✓	-	✓	-	✓
	Seismic action C2, BSZ zinc plated	-	-	✓	-	-	✓	-	-	✓	-	✓	-	✓	-
Base material	Cracked or uncracked concrete	✓													
	Reinforced or unreinforced concrete (without fibres) acc. to EN 206:2013	✓													
	Strength classes according to EN 206:2013: C20/25 to C50/60	✓													

### Use conditions (Environmental conditions):

- Structures subject to dry internal conditions (zinc plated steel, stainless steel or high corrosion resistant steel)
- Structures subject to external atmospheric exposure including industrial and marine environment or exposure to permanently damp internal condition, if no particular aggressive conditions exist (stainless steel or high corrosion resistant steel)
- Structures subject to external atmospheric exposure and to permanently damp internal condition, if other particular aggressive conditions exist (high corrosion resistant steel)

Note: Particular aggressive conditions are e.g. permanent, alternation immersion in seawater or the splash zone of seawater, chloride atmosphere of indoor pools or atmosphere with extreme chemical pollution (e.g. in desulphurization plants or road tunnels where deicing materials are used)

### Design:

- Anchorage are designed under the responsibility of an engineer experienced in anchorages and concrete work.
- Verifiable calculation notes and drawings are prepared taking account of the loads to be anchored. The position of the anchor is indicated on the design drawings (e.g. position of the anchor relative to reinforcement or to supports, etc.)
- Design method of anchorages according to EN 1992-4:2018 and EOTA Technical Report TR 055.

### Installation:

- Making of drill hole by hammer drilling (all sizes) or vacuum drill bit (BSZ 8 – BSZ 14). When using a vacuum drill bit no drill hole cleaning is required.
- Anchor installation carried out by appropriately qualified personal and under the responsibility of the person responsible for technical matters on site.
- After installation further turning of the anchor is not possible. The head of the anchor is supported on the fixture and is not damaged.
- The borehole may be filled with the Injection Systems VME or VME plus.
- Adjustment according to Annex B5: for concrete screw BSZ 8 to BSZ 14, all anchorage depths

## Concrete Screw BSZ

Intended use  
Specifications

Annex B1

**Table B1: Installation parameters**

Anchor size			BSZ 6		BSZ 8			BSZ 10			BSZ 12			BSZ 14		
Nominal embedment depth	$h_{nom}$	[mm]	40	55	45	55	65	55	75	85	65	85	100	75	100	115
Nominal drill bit diameter	$d_0$	[mm]	6		8			10			12			14		
Cutting diameter of drill bit	$d_{cut} \leq$	[mm]	6,40		8,45			10,45			12,50			14,50		
Effective anchorage depth	$h_{ef}$	[mm]	31	44	35	43	52	43	60	68	50	67	80	58	79	92
Depth of drill hole	$h_0 \geq$	[mm]	45	60	55	65	75	65	85	95	75	95	110	85	110	125
Diameter of clearance hole in the fixture	$d_f \leq$	[mm]	8		12			14			16			18		
Max. installation torque for screws with metric connection thread	$T_{inst} \leq$	[Nm]	10		20			40			60			80		
Tangential impact screw driver <sup>1)</sup>	$T_{imp,max}$	[Nm]	160		300			400			650			650		

<sup>1)</sup> Installation with tangential impact screw driver, with maximum power output  $T_{imp,max}$  acc. to manufacturer's instructions is possible

**Table B2: Minimum thickness of member, minimum edge distance and minimum spacing**

Anchor size			BSZ 6		BSZ 8			BSZ 10			BSZ 12			BSZ 14		
Nominal embedment depth	$h_{nom}$	[mm]	40	55	45	55	65	55	75	85	65	85	100	75	100	115
Minimum thickness of member	$h_{min}$	[mm]	80		80			80	90	102	80	101	120	87	119	138
Minimum spacing	$s_{min}$	[mm]	40	40	50	50			50	70	50	70	50	70		
Minimum edge distance	$c_{min}$	[mm]	40	40	50	50			50	70	50	70	50	70		

**Concrete Screw BSZ**

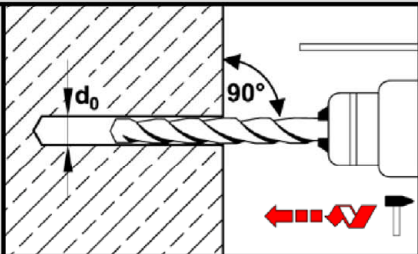

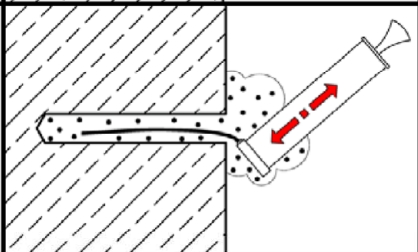

**Intended use**

Installation parameters / Minimum thickness of concrete member, minimum spacing and edge distance

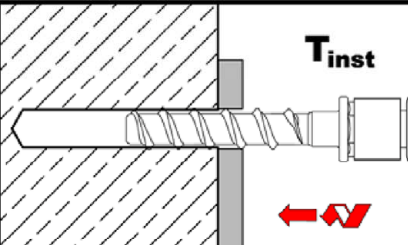

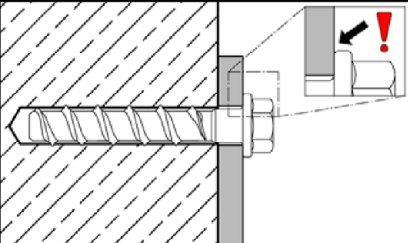

**Annex B2**

# Installation instructions

## Drill hole preparation and cleaning

1		Drill hole perpendicular to concrete surface. Using a vacuum drill, continue with step 3.
2		Blow out dust or alternatively vacuum clean down to the bottom of the hole.

## Installation concrete screw

3		Screw in, e.g. with tangential impact screw driver or torque wrench.
4		After installation, the head of the anchor is supported on the fixture and must be undamaged.

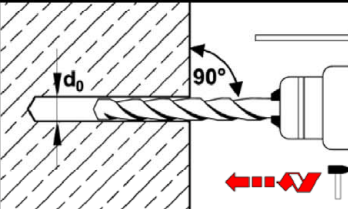

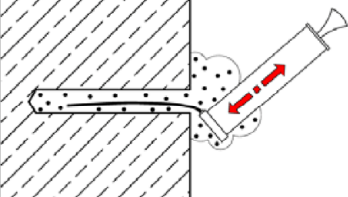

### Concrete Screw BSZ

Intended use  
Installation instructions

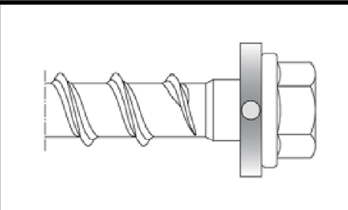

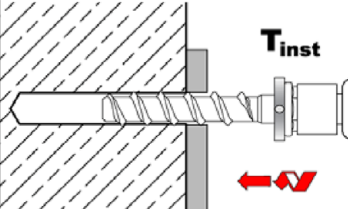

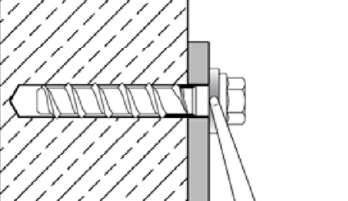

Annex B3

## Installation instructions - filling of annular gap

### Drill hole preparation and cleaning

1		<p>Drill hole perpendicular to concrete surface. Using a vacuum drill, continue with step 3.</p>
2		<p>Blow out dust or alternatively vacuum clean down to the bottom of the hole.</p>

### Installation concrete screw with filling washer

3		<p>Fit the filling washer to the concrete screw. The thickness of the filling washer must be taken into account with <math>t_{fix}</math>.</p>
4		<p>Screw in, e.g. with tangential impact screw driver or torque wrench.</p>
5		<p>Fill the annular gap between concrete screw and fixture with mortar (compressive strength <math>\geq 40 \text{ N/mm}^2</math>, e.g. Injection mortar VMH, VMZ or VMU plus). Use enclosed reducing adapter. Observe information on processing of the mortar! The annular gap is completely filled, when excess mortar seeps out.</p>

For seismic loading, the application with and without filling of annular gap is permitted (Annex C3-C4).

### Filling washer and reducing adapter for filling the annular gap between concrete screw and fixture

thickness of filling washer  
 $t = 5 \text{ mm}$

### Concrete Screw BSZ

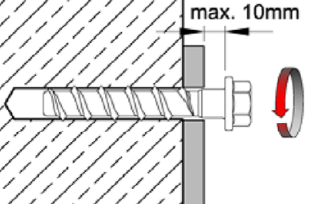

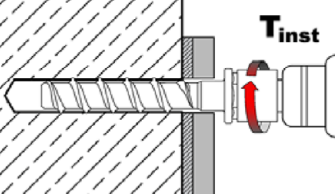

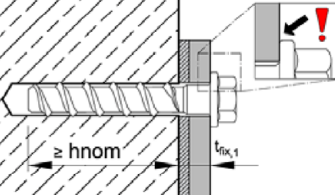

**Intended use**  
Installation instructions with filling of annular gap

**Annex B4**

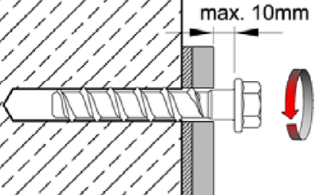

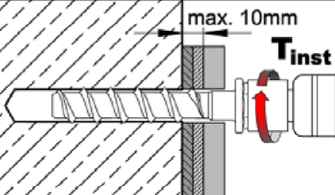

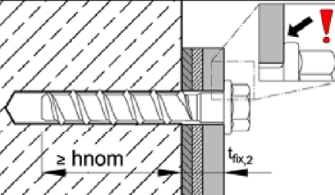

# Installation instructions - Adjustment

## Step 1 - 4 according to Annex B3

### 1. Adjustment

5		Screw may be untightened maximum 10mm.
6		After adjustment, screw in the concrete screw with tangential impact screw driver or torque wrench.
7		After installation, the head of the anchor is supported on the fixture must be undamaged.

### 2. Adjustment

8		Screw may be untightened maximum 10mm.
9		After adjustment, screw in the concrete screw with tangential impact screw driver or torque wrench.
10		After installation, the head of the anchor is supported on the fixture and must be undamaged.

- adjustment is permitted for fixings with concrete screws size BSZ 8 - BSZ 14, all anchorage depths
- the fastener may be adjusted max. 2x. The fastener must not be screwed back by more than 10mm in each case. The relining carried out during adjustment must not exceed 10 mm in total. Nominal embedment depth  $h_{nom}$  must still be maintained after the adjustment.
