DECLARACIÓN DE PRESTACIONES

DoP no MKT-132 - es

- ✧ **Código de identificación única del producto tipo:** **Ancla de impacto MKT E / ES**
- ✧ **Usos previstos:** Anclaje de expansión para uso como fijación múltiple de sistemas no estructurales en concreto, ver Anexo / Annex B
- ✧ **Fabricante:** MKT Metall-Kunststoff-Technik GmbH & Co.KG
Auf dem Immel 2
67685 Weilerbach
- Sistemas de evaluación y verificación de la constancia de las prestaciones (EVCP):** 2+
- ✧ **Documento de evaluación europeo:** **ETAG 001-6**
valuación técnica europea: **ETA-05/0116, 04.01.2017**
Organismo de evaluación técnica: DIBt, Berlin
Organismos notificados: NB 1343 – MPA, Darmstadt

✧ **Prestaciones declaradas:**

| Características esenciales | Prestaciones |
|--|---------------------|
| Seguridad en caso de incendio (BWR2) | |
| El comportamiento del fuego | Clase A1 |
| Resistencia al fuego | Anexo/Annex C4 – C5 |
| Seguridad durante el uso (BWR4) | |
| Resistencia característica para todas las direcciones de carga | Anexo/Annex C1 – C3 |

Las prestaciones del producto identificado anteriormente son conformes con el conjunto de prestaciones declaradas. La presente declaración de prestaciones se emite, de conformidad con el Reglamento (UE) no 305/2011, bajo la sola responsabilidad del fabricante arriba identificado.

Firmado por y en nombre del fabricante por:

Stefan Weustenhagen
 (Director general)
 Weilerbach, 04.01.2017

| Stainless steel A4 and high corrosion resistant steel HCR | | ✓ | | - | | ✓ | |
| Static and quasi-static loads | | | | ✓ | | | |
| Fire exposure | | | | ✓ | | | |
| Cracked and uncracked concrete | | | | ✓ | | | |
| Solid concrete C20/25 to C50/60 | | | | ✓ | | | |
| Anchorage depth $h_{ef} = 25$ mm | M6x25 | M8x25 | M10x25 | M12x25 | | | |
| Steel, zinc plated | | | ✓ | | | | |
| Stainless steel A4 and high corrosion resistant steel HCR | | | - | | | | |
| Static and quasi-static loads | | | ✓ | | | | |
| Fire exposure (solid concrete, C20/25 to C50/60) | | | ✓ | | | | |
| Cracked and uncracked concrete | | | ✓ | | | | |
| Solid concrete C12/15 to C50/60 | | | ✓ | | | | |
| Precast pre-stressed hollow core slabs (C30/37 to C50/60) | | | ✓ | | | | |

Base materials:

- reinforced or unreinforced normal weight concrete according to EN 206-1:2000

Use conditions:

- Structures subject to dry internal conditions (zinc plated steel, stainless steel or high corrosion resistant steel).
- Structures subject to external atmospheric exposure (including industrial and marine environment) or exposure to permanently damp internal condition, if no particular aggressive conditions exist (stainless steel or high corrosion resistant steel).
- Structures subject to external atmospheric exposure and to permanently damp internal condition, if other particular aggressive conditions (high corrosion resistant steel).

Note: Particular aggressive conditions are e.g. permanent, alternating immersion in seawater or the splash zone of seawater, chloride atmosphere of indoor pools or atmosphere with extreme chemical pollution (e.g. in desulphurization plants or road tunnels where de-icing materials are used.)

Drop-in Anchor E / ES

Intended use
Specifications

Annex B1

Specifications of intended use

Design:

- Anchorages are designed under the responsibility of an engineer experienced in anchorages and concrete work.
- Verifiable calculation notes and drawings are prepared taking account of the loads to be anchored. The position of the anchor is indicated on the design drawings (e.g. position of the anchor relative to reinforcement or to supports, etc.).
- The strength class and the length of the fastening screw or threaded rod shall be defined by the designing engineer
- Anchorages under static or quasi-static actions for multiple use for non-structural applications are designed in accordance with:
 - ETAG 001, Annex C, design method B, Edition August 2010 or
 - CEN/TS 1992-4:2009, design method B
- Anchorages under static or quasi-static actions for precast pre-stressed hollow core slabs:
 - ETAG 001, Annex C, design method C, Edition August 2010.
 - CEN/TS 1992-4:2009, design method C
- Anchorages under fire exposure are designed in accordance with:
 - ETAG 001, Annex C, design method B, Edition August 2010 and EOTA Technical Report TR 020, Edition May 2004 or
 - CEN/TS 1992-4:2009, Annex D
 - It must be ensured that local spalling of the concrete cover does not occur.

Installation:

- Anchor installation carried out by appropriately qualified personnel and under the supervision of the person responsible for technical matters of the site,
- Anchor installation in accordance with the manufacturer's specifications and drawings and using the appropriate tools,
- Drill hole by hammer drilling only (use of vacuum drill bits is admissible),
- Positioning of the drill holes without damaging the reinforcement.
