## DÉCLARATION DES PERFORMANCES

DoP No MKT-1.1-500\_fr

- ✧ **Code d'identification unique du produit type:** Cheville d'ancrage fixation lourde SL
- ✧ **Usage(s) prévu(s):** Cheville à expansion à couple contrôlé en acier galvanisé de taille M10 pour utilisation dans le béton non fissuré, voir l'annexe B / Annex B
- ✧ **Fabricant:** MKT Metall-Kunststoff-Technik GmbH & Co.KG  
Auf dem Immel 2  
67685 Weilerbach
- ✧ **Système(s) d'évaluation et de vérification de la constance des performances::** 1
- ✧ **Document d'évaluation européen:** EAD 330232-00-0601  
Évaluation technique européenne: ETA-08/0230, 14.05.2018  
Organisme d'évaluation technique: DIBt, Berlin  
Organisme(s) notifié(s): NB 2873 – Technische Universität Darmstadt
- ✧ **Performance(s) déclarée(s):**

Caractéristiques essentielles	Performances
<b>Résistance mécanique et stabilité (BWR 1)</b>	
Résistances caractéristiques pour les charges statiques et quasi-statiques, Décalage	Annexe/Annex C1 – C2
Résistances caractéristiques pour les catégories de performances sismiques C1 + C2, Décalage	NPD (No Performance Determined) performances non déterminées
<b>Sécurité en cas d'incendie (BWR 2)</b>	
Le comportement du feu	Classe A1
Résistance au feu	NPD (No Performance Determined) performances non déterminées

Les performances du produit identifié ci-dessus sont conformes aux performances déclarées. Conformément au règlement (UE) no 305/2011, la présente déclaration des performances est établie sous la seule responsabilité du fabricant mentionné ci-dessus.

## Specifications of intended use

### Anchorage subject to:

- Static or quasi-static action

### Base materials:

- Reinforced or unreinforced normal weight concrete without fibres of strength classes C20/25 to C50/60 according to EN 206:2013
- Uncracked concrete

### Use conditions (Environmental conditions):

- Structures subject to dry internal conditions (zinc plated steel).

### Design:

- Anchorages are designed under the responsibility of an engineer experienced in anchorages and concrete work.
- Verifiable calculation notes and drawings are prepared taking account of the loads to be anchored. The position of the anchor is indicated on the design drawings (e.g. position of the anchor relative to reinforcement or to supports, etc.).
- Anchorages are designed according to FprEN 1992-4: 2016 and EOTA Technical Report TR 055.

### Installation:

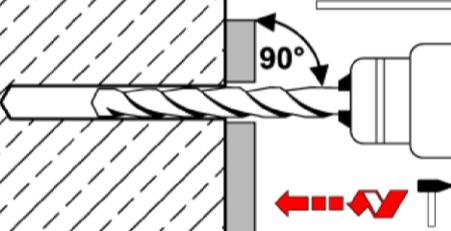

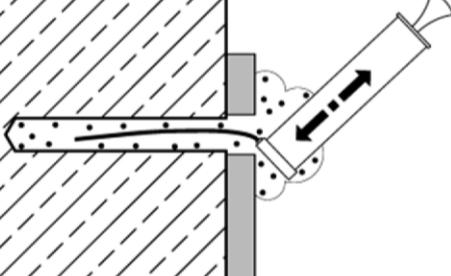

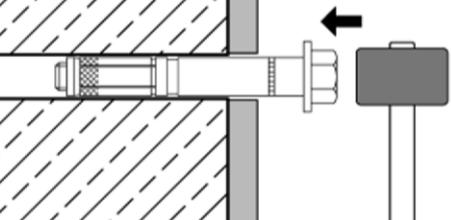

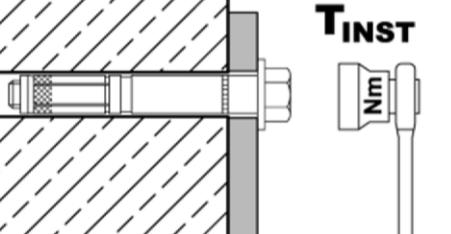

- Anchor installation carried out by appropriately qualified personnel and under the supervision of the person responsible for technical matters of the site.
- Positioning of the drill holes without damaging the reinforcement
- In case of aborted hole: new drilling at a minimum distance away of twice the depth of the aborted hole or smaller distance if the aborted drill hole is filled with high strength mortar and if under shear or oblique tension load it is not in the direction of load application.
- Anchor installation such that the effective anchorage depth is complied with. This compliance is ensured, when the embedment mark of the anchor does no more exceed the concrete surface
- Drilling by hammer drill bit (use of vacuum drill bit is admissible)

## Highload Anchor SL

Intended use  
Specifications

Annex B1

## Installation instructions

1		<p>Drill hole perpendicular to concrete surface. Using a vacuum drill bit, proceed with step 3.</p>
2		<p>Blow out dust. Alternatively vacuum clean down to the bottom of the hole.</p>
3		<p>Drive in anchor.</p>
4		<p>Apply tightening torque <math>T_{inst}</math> by using torque wrench.</p>
